DETAILED ACTION

1. This application is a 371 of PCT/IB03/05565, filed on December 1, 2003.
2. Claims 1-5, 7 & 9 are now pending.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claim 9 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 9 is drawn to a "program" *per se*, as recited in the preamble and as such is non-statutory subject matter. See MPEP § 2106.01. Data structures not claimed as embodied in tangible computer readable media are descriptive material *per se* and are not statutory because they are not capable of causing functional change in the computer. See, e.g., *Warmerdam*, 33 F.3d at 1361, 31 USPQ2d at 1760 (claim to a data structure *per se* held nonstatutory). Such claimed data structures do not define any structural and functional interrelationships between the data structure and other claimed aspects of the invention, which permit the data structure's functionality to be realized. In contrast, a claimed tangible computer readable medium encoded with a data structure defines structural and functional interrelationships between the data structure and the computer software and hardware components which permit the data structure's functionality to be realized, and is thus statutory. Similarly, computer programs claimed as computer listings *per se*, i.e., the descriptions or expressions of the programs are not physical "things." They are neither computer components nor statutory processes, as they are not "acts" being performed. Such claimed computer programs do not define any structural and functional

interrelationships between the computer program and other claimed elements of a computer, which permit the computer program's functionality to be realized.

Allowable Subject Matter

5. Claims 1-5 & 7 are allowed over the prior art of record in light of applicant's amendment.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Note that claim 9, as originally filed, recited "the method as claimed in claim 8", which was rejected under 35 U.S.C. § 112-2nd paragraph because claim 8 was directed to an optical record carrier, not a method. In light of this indefiniteness, claim 9 was interpreted to be a computer program embodied on the optical record carrier of claim 8, which was proper under the provisions of 35 U.S.C. § 101. However, the applicant now amended claim 9 to be dependent upon method claim 7. While this amendment has overcome the rejection under 35 U.S.C. § 112-2nd paragraph, the amendment now necessitates a rejection under 35 U.S.C. § 101 for being directed to non-statutory subject matter. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2627

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
